## Education

**Charotar University of Science and Technology (CSPIT)** Anand,Gujarat
B.Tech in Computer Science and Engineering July 2020 – June 2024

- CGPA: 9.83 / 10.0

## Experience

**Software Engineer**, Codal – India January 2024 – Present

- Core developer on a **high-traffic U.S. healthcare e-commerce platform**; led delivery of **automated prescription refills and dependent prescription support**, **boosting daily order volume by 2,000+** with zero critical post-release issues.
- Built a **Customer Support Automation** platform with **Vertex AI**-powered summarization, **resolving support queries 67% faster** and significantly reducing manual triage effort.
- Improved overall platform performance by **30%** through proactive code reviews, API optimization, and backend refactoring in **Python** and **React/Next.js**.

**Python Intern**, SOLITS – India January 2023 – July 2023

- Built a **Hostel Management System** for Nisarg Hostel using **Python and Django**, automating room allocation, billing, and student records — **reducing administrative staff workload by 40%** and eliminating manual data entry errors.

## Projects

**Smart Marksheet Scanner**

- Led a 5-member team to build **Smart Marksheet Scanner**, winning the **SSIP Hackathon** — a Python + React OCR system achieving **95%+ accuracy** in marksheet validation for **ACPDC (Govt. of Gujarat)**, now in active use at Charotar University.

**Agentic Coding Assistant**

- Built a modular **agentic coding system** using **Claude Code, Hermes, and OpenClaw** to automate planning, code generation, and review workflows — **cutting repetitive development cycles by 50%**.
- Implemented a **skill-based sub-agent architecture** with structured reasoning pipelines and self-verification, **improving agent output reliability by 35%** across multi-step tasks.

**RTOCR (In Progress)**

- Developing a **vision-assist device** for visually impaired users using **Azure AI, Computer Vision, and OCR** — enabling real-time text and object recognition with **sub-500ms response time**.

## Technologies

**Languages:** C++, Python, JavaScript, Dart, SQL

**Frameworks:** Django, Flask, FastAPI, React.js, Next.js

**Databases:** PostgreSQL, Redis, MySQL, Firebase

**Cloud/DevOps:** AWS, Azure, GCP (Vertex AI), Docker

**AI / Agentic:** Claude (Anthropic), Hermes, OpenClaw, Vertex AI, PyTorch, Prompt Engineering

**Tools & Others:** Git/GitHub, DSA, Problem Solving

## Certifications

- Microsoft Certified: Azure AI Fundamentals
- Building Real-Time Video AI Applications – NVIDIA
- Microsoft Certified: Azure Data Fundamentals
