Kevin Colaco

Full Stack Engineer

India | kevincolaco.kc@gmail.com | +91 9725819469 | linkedin.com/in/kevin-colaco-kc | github.com/kevin-colaco

Software engineer with 2+ years building **Python** backend services, full-stack features, and AI automation for a high-traffic U.S. healthcare e-commerce platform. Experienced with Django, FastAPI, REST and GraphQL APIs, microservices, React/Next.js with TypeScript, and LLM tooling on GCP Vertex AI.

Experience

Software Engineer, Codal, India — Jan 2024 – Present

- Core developer on a high-traffic U.S. healthcare e-commerce platform; spearheaded delivery of automated prescription refills and dependent prescription support, **boosting daily order volume by 2,000+** with zero critical post-release issues.
- Implemented **order routing logic** that directs **~120 prescription orders per day** across 2 partner pharmacies, with more pharmacies planned.
- Partnered with a third-party pharmacy network to design and build **Rx management integrations** for transfers and refills, now handling **4–5 prescription transfers daily (120+ per month)**.
- Created a Customer Support Automation tool with LLM-powered summarization on **Vertex AI**, **resolving support queries 67% faster** and reducing manual triage effort.
- Drove the **Python 3.9 to 3.12 upgrade** across the entire production codebase.
- Improved overall application performance by **30%** through code reviews, REST API optimization, and backend refactoring in Python; shipped customer-facing UI features in React/Next.js.

Python Intern, SOLITS, India — Jan 2023 – Jul 2023

- Developed a Hostel Management System for Nisarg Hostel in Python and Django, automating room allocation, billing, and student records; **reduced administrative workload by ~40%** and eliminated manual data entry errors.

Projects

Smart Marksheet Scanner | Python, React, OCR — GitHub

- Led a 5-member team to an **SSIP Hackathon win** with an OCR system that validates student mark sheets at **95%+ accuracy** for ACPDC (Govt. of Gujarat); now in active use at Charotar University.

Agentic Coding Assistant | Claude Code, Hermes, OpenClaw — Private

- Engineered a modular agentic coding system with skill-based sub-agents and self-verification that automates planning, code generation, and review, **cutting repetitive development cycles by ~50%** and **improving output reliability by 35%**.

RTOCR (In Progress) | Azure AI, Computer Vision, OpenCV — GitHub

- Developing a vision-assist device for visually impaired users with real-time text and object recognition at **sub-500ms response time**.

Skills

Languages: Python, TypeScript, JavaScript, SQL, C++, Dart

Backend: Django, FastAPI, Flask, REST APIs, GraphQL, Celery, Microservices

Frontend: React, Next.js, Tailwind CSS, HTML, CSS

Data and Cloud: PostgreSQL, MySQL, Redis, Firebase, AWS, Azure, GCP, Docker, Kubernetes, Linux

AI / Agentic: LLMs, RAG, Embeddings, Vertex AI, Claude Code, Hermes, OpenClaw, PyTorch, OpenCV, OCR

Practices: Unit Testing (pytest), CI/CD, Agile/Scrum, Code Review, Git

Education and Certifications

Charotar University of Science and Technology (CSPIT), Anand, Gujarat — Jul 2020 – Jun 2024

- B.Tech in Computer Science and Engineering; **CGPA 9.83 / 10**
- Microsoft Certified: Azure AI Fundamentals, Azure Data Fundamentals; NVIDIA: Building Real-Time Video AI Applications
